

EXECUTIVE DELIVERY & SPECIFICATION AUDIT REPORT

Direct milestone audit comparing the 7-page Development Specification with delivered portal capabilities, extra enterprise additions, and future development roadmap.

PREPARED FOR AdSkill Consultancy Inc.	PRODUCT NAME AdSkill PayTrack AI	CURRENT RELEASE Phase 1: Core Portal Launch	DOCUMENT DATE September 22, 2026
--	-------------------------------------	--	-------------------------------------

1. SPECIFICATION PDF VS. WHAT WE HAVE DONE NOW

Line-by-line audit against the 7-page AdSkill Client Payment Tracker Specification Document

PDF SECTION & SPEC REQUIREMENT	WHAT THE CLIENT ASKED IN SPEC PDF	WHAT WE HAVE DONE NOW (CURRENT BUILD)	STATUS
§3. Roles & Permissions	4 roles: Super Admin, Finance Manager, Consultant, Client. Enforce strict isolation.	Complete 4-tier role architecture. Clients see only their data; staff see assigned clients. PBAC control live.	COMPLETED
§4. Client Profile & Dossier	Unique Client ID (ASK-2026-XXXX), WhatsApp, address, consultant assignment, agreement dates.	Automated Client ID generation, contact details, assigned consultant, agreement dates, notes, and file attachments.	COMPLETED
§5. Services & Fee Separation	Service catalog (EB-2, EB-1A, E-2, etc.). Strict separation of AdSkill fees from USCIS/attorney fees.	Service catalog live with distinct breakdown: AdSkill Professional Fee, Gov Filing Fee, Attorney Fee, 3rd-Party Fees.	COMPLETED
§6. Payment Plan Creation	Contracted fee, deposit/retainer, installment count, due dates, grace period, discount reasons. Validate totals.	Interactive plan builder with auto-installments, discount audit capture, and deterministic balance validation.	COMPLETED
§7. Payment Records & Methods	Track Wire, Zelle, Cash, Check, Card, Stripe. Partial/ refunds. Zero deletion policy (void/reversal).	Payment recording center live across all channels. Offline verification workflow (Pending -> Verified). Immutable records.	COMPLETED
§8. Financial Math Rules	Deterministic accounting math (no AI guessing money). Exact decimal precision in USD.	Server-side deterministic accounting for paid, pending, overdue, and remaining balances across all cases.	COMPLETED
§9. Management Dashboard	Total contracted fees, collected revenue, outstanding, overdue, upcoming dues, export CSV/Excel/PDF.	Executive Dashboard live with real-time KPI metrics, revenue charts, upcoming receivables, and financial summary reports.	COMPLETED
§10. Client Dashboard	Client view: service name, fee breakdown, total paid, balance, next due date, and document downloads.	Private responsive Client Portal with clear milestone progress, fee transparency, payment schedules, and PDF downloads.	COMPLETED
§11. Invoices & Receipts (PDF)	Branded PDFs with AdSkill logo, sequential numbering (INV-..., RCT-...), contact info, disclaimers.	Branded PDF engine generating official sequential Invoices and Receipts with corporate seals and legal disclaimers.	COMPLETED
§12. Email Notifications	Payment reminders before due date and for overdue installments with client preference controls.	Email reminder engine and notification data models built. Client notification preference management active.	COMPLETED
§13. Payment Gateway (Stripe)	Stripe checkout/payment links and manual verification for offline bank transfers and cash.	Manual offline verification workflow fully active. Stripe gateway models & webhooks structured for live activation.	GATEWAY READY
§14. Controlled AI Functions	Safe AI assistant for schedule explanation and reminder drafting (never altering financial numbers).	Strict safety boundaries & prompt architecture established; scheduling engine ready for live AI assistant hookup.	PHASE 2 PIPELINE
§15–17. Security, Privacy & Audit	Encrypted logins, session security, privacy policies, and an immutable audit log recording changes.	Bank-grade bcrypt security, JWT auth, terms/privacy legal pages, and tamper-proof audit trail with timestamps and IP.	COMPLETED
§18. Search & Responsive UI	Fast search by name, ID, phone, email, invoices, receipts. Mobile, tablet, and desktop friendly UI.	Instant universal search bar across all entities. Modern responsive UI deployed live on Vercel with mobile navigation.	COMPLETED

2. VALUE-ADDED CAPABILITIES (BUILT BEYOND THE SPEC)

Enterprise enhancements engineered into the live platform to elevate security, communication, and client experience

EXTRA FEATURE BUILT	IMPLEMENTATION DETAILS	EXECUTIVE BUSINESS VALUE
Support & Ticketing Desk	Built-in two-way client communication portal with tracking codes (TKT-2026-XXXX), priority levels (Normal/Urgent), staff assignment, and conversation history.	Eliminates scattered emails and WhatsApp chats; all client inquiries are tracked, assigned, and resolved inside the secure portal.
3-Tier Collaboration Case Notes	Case collaboration system with 3 privacy settings: Client-Visible, Staff-Only, and Super-Admin-Only, with pin-to-top functionality for critical updates.	Consultants can discuss sensitive client background and fee decisions internally without clients ever seeing internal remarks.
Public Brand Website & Portal	Complete public-facing website featuring Home, About Us, Advisory Services, Transparent Pricing, Contact, Privacy Policy, and Terms of Service.	AdSkill gains a ready-to-use modern web presence that converts visitors directly into authenticated portal clients.
Dynamic PBAC Permission Engine	Granular Policy-Based Access Control allowing administrators to dynamically adjust role privileges without updating software code.	Future-proof flexibility as AdSkill scales team members, hires new specialists, or modifies internal approval chains.
Encrypted Cloud File Vault (S3)	AWS S3 storage integration with pre-signed temporary download links, MIME-type validation, and automated virus/clean status indicators.	Protects sensitive client passports, agreements, and wire receipts with enterprise-grade cloud security.
Universal Instant Search	Global search header across client names, IDs, email addresses, phone numbers, case codes, invoice numbers, and receipt numbers.	Staff saves significant time by locating any client file or transaction in seconds across thousands of records.

3. FUTURE DEVELOPMENT ROADMAP (PHASES 2 & 3)

Planned system expansions per the specification roadmap to maximize automation and client convenience

PHASE / TIMELINE	FEATURE NAME	CAPABILITIES & EXPECTED BUSINESS IMPACT
Phase 2.1 (Immediate)	AI Schedule Explainer & Smart Drafter	Controlled AI assistant that explains complex payment milestones in plain English for clients, and drafts polite, personalized payment reminder emails for staff review. Saves consultant hours answering routine billing inquiries.
Phase 2.2 (Upcoming)	Automated WhatsApp & SMS Alerts	Automated multi-channel alerts sent 7 days before, 3 days before, on due date, and during overdue periods directly to client mobile devices. Significantly accelerates cash collection and eliminates manual follow-ups.
Phase 2.3 (Upcoming)	Live Stripe 'Pay Now' Checkout	Integrated hosted Stripe Checkout button in the client portal enabling immediate debit/credit card and ACH payments with instant automatic ledger reconciliation and official receipt generation.
Phase 3.1 (Future Expansion)	Immigration Case Stage & Intake Tracker	Visual case progress tracker (Intake -> Evidence Collection -> Petition Filing -> RFE -> Approval) with client document upload checklists. Expands payment tracking into a complete AdSkill CRM.
Phase 3.2 (Future Expansion)	QuickBooks Accounting Sync	Automated two-way integration syncing invoices, received payments, client balances, and refunds directly into AdSkill corporate QuickBooks accounts for seamless bookkeeping and tax compliance.
Phase 3.3 (Future Expansion)	Multi-Language Internationalization	Complete portal translation into Bengali, Spanish, and Portuguese to provide a premium localized onboarding and payment experience for international clients.

EXECUTIVE MILESTONE VERIFICATION & LIVE ACCESS

This document certifies that the Phase 1 core deliverables have been fully engineered, validated, and deployed for stakeholder testing at:
